

Designation: A 411 – 9803

Standard Specification for Zinc-Coated (Galvanized) Low-Carbon Steel Armor Wire¹

This standard is issued under the fixed designation A 411; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This specification covers zinc-coated low-carbon steel wire for use in armoring for protection against damage of submarine and underground cables used for communication, control, or power purposes.

1.2 The values stated in inch-pound units are to be regarded as the standard.

¹ This specification is under the jurisdiction of ASTM Committee A-5 A05 on Metallic Coated Iron and Steel Products and is the direct responsibility of Subcommittee A05.12 on Wire Specifications.

Current edition approved April 10, 1998; October 1, 2003. Published November 1998; December 2003. Originally published as A 411 – 57; approved in 1957. Last previous edition A 411 – 86 (1996); approved in 1998 as A 411 - 98.

*A Summary of Changes section appears at the end of this standard.
