

Designation: B 237 – 9601

An American National Standard

Standard Specification for Refined Antimony¹

This standard is issued under the fixed designation B 237; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

- 1.1 This ~~standard~~ specification covers refined antimony in ingot, pig, or cake form.
- 1.2 The values stated in inch-pound units are to be regarded as the standard. The values given in parentheses are for information only.
- 1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

- 2.1 The following documents of the issue in effect on the date of material purchase form a part of this specification to the extent referenced herein.
- 2.2 *ASTM Standards:*
E 29 Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications²

¹ This specification is under the jurisdiction of ASTM Committee ~~B-2~~ B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.02 on Refined Lead, Tin, Antimony, and Their Alloys.

Current edition approved ~~May~~ Nov. 10, 1996; ~~2001~~. Published ~~June 1996~~, January 2002. Originally published as B 237 – 95. Last previous edition B 237 – ~~95~~, 96.
