

Designation: B 637 – 9803

Standard Specification for Precipitation-Hardening Nickel Alloy Bars, Forgings, and Forging Stock for High-Temperature Service¹

This standard is issued under the fixed designation B 637; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the Department of Defense.

¹ This specification is under the jurisdiction of ASTM Committee B-2 B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.07 on Refined Nickel and Cobalt and Their Alloys.

Current edition approved Apr. 10, 1998, 2003. Published September 1998, July 2003. Originally published as A 637 – 70. Redesignated B 637 approved in 1987. Last previous edition A approved in 1998 as B 637 – 93a8.
