

Designation: B 752 – 9701

Standard Specification for Castings, Zirconium-Base, Corrosion Resistant, for General Application¹

This standard is issued under the fixed designation B 752; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers zirconium and zirconium-alloy castings for general corrosion-resistant and industrial applications.

1.2 The values stated in either inch-pound units or SI units are to be regarded separately as the standard. Within the text, the SI units are shown in brackets. The values stated in brackets each system are not exact equivalents; therefore, each system shall be used independently of the other. Combining values from the two systems may result in nonconformance with the specification.

2. Referenced Documents

2.1 ASTM Standards:

A 802/A 802M Practice for Steel Castings, Surface Acceptance Standards, Visual Examination²

¹ This specification is under the jurisdiction of ASTM Committee B-10 on Reactive and Refractory Metals and Alloys and is the direct responsibility of Subcommittee B10.052 on Castings, Zirconium and Hafnium.

Current edition approved Oct. Nov. 10, 1997; 2001. Published February 1998. January 2002. Originally published as B 752 – 85. Last previous edition B 752 – 91 (1995); B 752 – 97.
