

Designation: ~~B 753 – 86 (Reapproved 1998)~~ 753 – 01

An American National Standard

Standard Specification for Thermostat Component Alloys¹

This standard is issued under the fixed designation B 753; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification describes requirements for alloys to be used as components in the manufacture of bonded multi-component thermostat metal strip. More specifically it describes alloys having composition, and thermal expansion suitable for application in thermostat metal sheet and strip.

2. Referenced Documents

2.1 *ASTM Standards:*

A 480 Specification for General Requirements for Flat-Rolled Stainless and Heat-Resisting Steel Plate, Sheet, and Strip²

¹ This test method is under the jurisdiction of ASTM Committee ~~B-2~~ B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.10 on Thermostat Metals.

Current edition approved ~~Jan. 31, 1986~~ May 10, 2001. Published ~~March 1986~~ July 2001. Originally published as B 753 - 86. Last previous edition B 753 - 86 (1998).
