

Designation: C 71 – 01a

Standard Terminology Relating to Refractories¹

This standard is issued under the fixed designation C 71; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This terminology covers terms particularly related to refractories and encompasses raw materials, manufacture, finished products, applications, and testing procedures.

1.2 When any of the definitions in this terminology are quoted or published out of context, editorially insert the limiting phrase “in refractories” after the dash following the term to properly limit the field of application of the term and definition.

2. Referenced Documents

2.1 ASTM Standards:

¹ This terminology is under the jurisdiction of ASTM Committee C08 on Refractories and is the direct responsibility of Subcommittee C08.92, The Joseph E. Kopanda Subcommittee for Editorial and Terminology.

Current edition approved April Dec. 10, 2001. Published June 2001, January 2002. Originally published as C 71 – 27. Last previous edition C 71 – 00a1.
