

Designation: C 226 – 9602

Standard Specification for Air-Entraining Additions for Use in the Manufacture of Air- Entraining Hydraulic Cement¹

This standard is issued under the fixed designation C 226; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the Department of Defense.

1. Scope

1.1 This specification covers the requirements and methods for establishing the suitability of a material for use as an air-entraining addition to be interground with the clinker in the manufacture of air-entraining hydraulic cement conforming to Specifications C 150, C 595, and C 1157.

1.2 The values stated in SI units are to be regarded as the standard.

1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory

¹ This specification is under the jurisdiction of ASTM Committee C-1 C01 on Cement and is the direct responsibility of Subcommittee C01.20 on Additions. Current edition approved July 10, 1996; 2002. Published September 1996; August 2002. Originally published as C 226 – 50 T. Last previous edition C 226 – 95ε.
