

Designation: C 303 – 9802

Standard Test Method for Dimensions and Density of Preformed Block and Board-Type Thermal Insulation¹

This standard is issued under the fixed designation C 303; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This test method covers determination of the dimensions and density of block and board insulation as defined in Terminology C 168.

1.2 The values stated in the SI system are to be regarded as the standard.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This test method is under the jurisdiction of ASTM Committee C=16 on Thermal Insulation and is the direct responsibility of Subcommittee C 16.32 on Mechanical Properties.
