

Designation: D 807 – 9600

Standard Test Method Practice for Assessing the Tendency of Industrial Boiler Waters to Cause Embrittlement (USBM¹ Embrittlement Detector Method)²

This standard is issued under the fixed designation D 807; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

¹ United States Bureau of Mines.

² This test method is under the jurisdiction of ASTM Committee D-19 on Water and is the direct responsibility of Subcommittee D19.03 on Sampling of Water and Water-Formed Deposits, Surveillance of Water and Flow Measurement of Water.

Current edition approved ~~May~~ June 10, 1996; 2000. Published ~~July 1996~~ September 2000. Originally published as D807 – 44 T. Last previous edition ~~D807 – 82 (1990)~~^{ε1}.
