

Designation: D-2296 — 84 (Reapproved 1995)^{€1} 2296 — 01

Standard Specification for Continuity of Quality of Electrical Insulating Polybutene Oil for Capacitors¹

This standard is issued under the fixed designation D 2296; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (€) indicates an editorial change since the last revision or reapproval.

^{€1} NOTE — Section 8 was added editorially in November 1995.

1. Scope

1.1 This specification provides the limits within which the properties of ~~Type D-27-3000-1~~ electrical insulating polybutene oil for capacitors shall conform in order to ensure an unvarying continuity in the quality and grade of polybutene oil supplied.

1.2 It is expected that additional laboratory or service tests of the purchaser's own choosing may be applied to polybutene oil from each source of supply before approval for use.

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This specification is under the jurisdiction of ASTM Committee D-27 on Electrical Insulating Liquids and Gases and is the direct responsibility of Subcommittee D27.02 on Gases and Synthetic Liquids.
