

Standard Specification for Continuity of Quality of Electrical Insulating Polybutene Oil for Capacitors¹

This standard is issued under the fixed designation D 2296; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification provides the limits within which the properties of electrical insulating polybutene oil for capacitors shall conform in order to ensure an unvarying continuity in the quality and grade of polybutene oil supplied.

1.2 It is expected that additional laboratory or service tests of the purchaser's own choosing may be applied to polybutene oil from each source of supply before approval for use.

3. Terminology

3.1 Definitions:

3.1.1 For definitions applicable to the properties listed in Table 1, reference should be made to Guide D 117. For standard definitions refer to Terminology D 2864.

4. Materials and Manufacture

4.1 No change shall be made in the type of polybutene oil without prior agreement with the purchaser. The polybutene oil shall not contain additives.

5. Detail Requirements and Test Methods

5.1 Electrically insulating polybutene oil shall conform to the requirements prescribed in Table 1 and shall be tested in accordance with the test methods listed therein.

6. Sampling

6.1 Electrically insulating polybutene oil shall be sampled in accordance with Practice D 923.

7. Shipping

7.1 All polybutene oil containers, including attendant pipes and pumps, shall be clean and dry. No change shall be made in the approved type of containers without prior agreement with the purchaser.

¹ This specification is under the jurisdiction of ASTM Committee D27 on Electrical Insulating Liquids and Gases and is the direct responsibility of Subcommittee D27.02 on Gases and Synthetic Liquids.

Current edition approved April 10, 2001. Published June 2001. Originally published as D 2296 – 64 T. Last previous edition D 2296 – 84.
