

Designation: D 3002 – 9702

Standard Guide for Evaluation of Coatings Applied to Plastics¹

This standard is issued under the fixed designation D 3002; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

¹ ~~Bias~~ This guide is under the jurisdiction of ASTM Committee ~~D-1~~ D01 on Paint and Related Coatings, Materials, and Applications and is the direct responsibility of Subcommittee D01.55 on Factory-Applied Coatings on Preformed Products.

Current edition approved ~~June Dec. 10, 1997; 2002~~, Published ~~September 1997; February 2003~~. Originally published as ~~D 3002—71~~, approved in 1971. Last previous edition approved in 1997 as D 3002 – 94⁷.

1. Scope

1.1 This guide is intended for the evaluation of clear and pigmented coatings designed for use on rigid or semirigid plastic substrates. Coated film and sheeting are not covered by this guide.

1.2 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*
