

Designation: D 3065 – 9401

Standard Test Methods for Flammability of Aerosol Products¹

This standard is issued under the fixed designation D 3065; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the Department of Defense.

1. Scope

1.1 These test methods cover the determination of flammability hazards for aerosol products.

1.2 These test methods appear in the following order:

Flame Projection Test	Section
~~Tag Open-Cup Flash Point~~	4 to 7
~~Test~~	~~8 to~~
~~Closed-Drum Test~~	12
	13

<u>Closed Drum Test</u>	13
-------------------------	----

1.3 This standard should be used to measure and describe the properties of materials, products, or assemblies in response to heat and flame under controlled laboratory conditions and should not be used to describe or appraise the fire hazard or fire risk of materials, products, or assemblies under actual fire conditions. However, results of this test may be used as elements of a fire risk assessment which takes into account all of the factors which are pertinent to an assessment of the fire hazard of a particular end use.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*
