

Designation: D 3772 – 9701

Standard Specification for Natural Rubber Finger Cots¹

This standard is issued under the fixed designation D 3772; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers the requirements for finger cots made from natural rubber latex. The purpose of this specification is to obtain consistent performance among products produced in various locations or at various times in the same location.

1.2 This specification does not cover the safe and proper use of finger cots or products of special construction for special use.

1.3 The values stated in SI units are to be regarded as the standard.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*
