

Designation: D 5463 – 9803

Standard Guide for Use of Test Kits to Measure Inorganic Constituents in Water¹

This standard is issued under the fixed designation D 5463; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This guide covers general considerations for the use of test kits for quantitative determination of analytes in water and wastewater. Test kits are available from various manufacturers for the determination of a wide variety of analytes in drinking water, surface or ground waters, domestic and industrial feedwaters and wastes, and water used in power generation and steam raising.

¹ This guide is under the jurisdiction of ASTM Committee D-19 on Water and is the direct responsibility of Subcommittee D19.05 on Inorganic Constituents in Water. Current edition approved July 10, 1998; 2003. Published November 1998; July 2003. Originally published as D 5463-93, approved in 1993. Last previous edition approved in 1998 as D 5463-93ε.

*A Summary of Changes section appears at the end of this standard.
