

Designation: D 6014 – 9600

Standard Test Method for Determination of Dynamic Water Absorption of Leather Surfaces¹

This standard is issued under the fixed designation D 6014; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This test method covers determining the degree of wettability of a leather surface. This test method does not apply to wet blue.

1.2 The values stated in inch-pound units are to be regarded as the standard. The SI units given in parentheses are for information only.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This test method is under the jurisdiction of ASTM Committee D31 on Leather and is the direct responsibility of Subcommittee D31.04 on Apparel and Upholstery. This test method was developed from Federal Test Method Standard No. 311, Method 8151 in cooperation with the U.S. Army Natick Research Development & Engineering Center, Natick MA and the Defense Personnel Support Center Directorate of Clothing and Textiles, Philadelphia PA.

Current edition approved Oct. 10, 1996; 2000. Published December 1996. Originally published as D 6014 - 96. Last previous edition D 6014 - 96.
