

Designation: D 6281 – 9804

Standard Test Method for Airborne Asbestos Concentration in Ambient and Indoor Atmospheres as Determined by Transmission Electron Microscopy Direct Transfer (TEM)¹

This standard is issued under the fixed designation D 6281; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

¹ This test method is under the jurisdiction of ASTM Committee D-22 on Sampling and Analysis of Atmospheres and is the direct responsibility of Subcommittee D22.07 on Asbestos.

Current edition approved July 10, 1998; April 1, 2004. Published October May 2004. Originally approved in 1998. Last previous edition approved in 1998 as D 6281 - 98.
