

Standard Test Methods for Solvent Bearing Bituminous Compounds¹

This standard is issued under the fixed designation D 6511; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 These test methods cover procedures for sampling and testing solvent bearing bituminous compounds for use in roofing and waterproofing.

1.2 The test methods appear in the following order:

	Section
Sampling	4
Uniformity	5
Weight per gallon	6
Nonvolatile content	7
Solubility	8
Ash content	9
Water content	10
Consistency	11
Behavior at 60°C (140°F)	12
Pliability at -0°C (32°F)	13
Aluminum content	14
Reflectance of aluminum roof coatings	15
Strength of laps of rolled roofing adhered with roof adhesive	16
Adhesion to damp, wet, or underwater surfaces	17
Mineral stabilizers and bitumen	18
Mineral matter	19
Volatile organic content	20

1.3 The values stated in SI units are to be regarded as the standard. The values given in parentheses are for information only.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*
