INTRODUCTION

These tables were developed from data published by the U.S. Department of Commerce, Caesar Study, and Size USA Study, ASTM Misses Figure Type standard **D5585-11**, Current USA industry and Studies, Scans and documentation from Alvanon Inc.² This standard takes into consideration Misses Petite figure at a standard height of 5 ft 2½ in. (65 % of average USA population) taking into account the decrease and increase in body weight that shift a person from one size to another, while this person does not gain in height. Also included is a definition of body type, Curvy or Straight as applied to waist, high hip, hip/seat, thigh and mid-thigh girths that result in a different body shape (silhouette). Major review and evaluation was done. The incremental growth at different key body points has been addressed and defined, which resulted in identifying increases and decreases at different rates in specific areas; bust, waist, high hip and hip/seat. Additionally to better serve the industry, incremental movement between sizes was reviewed ensuring smooth transition between sizes. To verify the proposed body measurements, a three-dimensional Avatar was created in the Misses Petite size range 00P through 20P (Curvy and Straight) by Alvanon Inc. for a visual reference and is also attached in the documentation.

1. Scope

1.1 These tables list body measurements of adult female misses petite figure type sizes 00P through 20P. Although these are body measurements, they can be used as a baseline in designing apparel for Misses Petite in this size range when considering such factors as fabric type, ease for body movement, styling, and fit.

1.2 These tables list body measurements for the complete range of misses petite sizing.

1.3 The values stated in either SI units or inch-pound units are to be regarded separately as standard. The values stated in each system may not be exact equivalents; therefore, each system shall be used independently of the other. Combining values from the two systems may result in non-conformance with the standard.
