

Designation: F 621 – 9702

Standard Specification for Stainless Steel Forgings for Surgical Implants¹

This standard is issued under the fixed designation F 621; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This specification covers the requirements of forged stainless steel for surgical implants when the material forged conforms to Specification F 138 (UNS S31673), Specification F 1314 (UNS S21910), or Specification F 1586 (UNS S31675).

1.2 The values stated in inch-pound units are to be regarded as the standard.

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This specification is under the jurisdiction of ASTM Committee F-4 F04 on Medical and Surgical Materials and Devices and is the direct responsibility of Subcommittee F04.12 on Metallurgical Materials.

Current edition approved April 10, 1997; 2002. Published March 1998; June 2002. Originally published as F 621 – 79. Last previous edition F 621 – 927.

*A Summary of Changes section appears at the end of this standard.
