

Standard Specification for Shipbuilders and Marine Paints and Coatings Product/ Procedure Data Sheet¹

This standard is issued under the fixed designation F718; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the U.S. Department of Defense.

1. Scope

1.1 The Shipbuilders and Marine Paints and Coatings Product/Procedure Data Sheet² provides on one sheet needed information concerning the characteristics of a specific paint or coating to include generic description, physical properties, surface preparation requirements, application requirements, and safety. The front side of the sheet contains four major, numbered paragraphs and a highlighted section for *Special Safety Precautions*. These paragraphs are as follows:

- I. Generic Type and Description
- II. Manufacturers Data
- III. Properties
- IV. Surface Preparation Minimum Requirements

The back side of the page contains the following paragraphs:

- V. Mixing Procedure
- VI. Application

1.2 The completed data sheets can be used by technical personnel to help evaluate the technical acceptability of a proposed material, by production personnel to evaluate production compatibility of proposed materials and to provide application instructions for selected paints and coatings materials, and by quality control personnel to verify attributes of materials.

1.3 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

¹ This standard is under the jurisdiction of ASTM Committee F25 on Ships and Marine Technology and is the direct responsibility of Subcommittee F25.01 on Structures.

Current edition approved May 1, 2017. Published June 2017. Originally approved in 1981. Last previous edition approved in 2011 as F718 – 07 (2011)^{ε1}. DOI: 10.1520/F0718-07R17.

² Available from ASTM International Headquarters. Order Adjunct No. ADJF0718. Original adjunct produced in 1993.

2. Referenced Documents

2.1 ASTM Standards:³

- D56 Test Method for Flash Point by Tag Closed Cup Tester
- D93 Test Methods for Flash Point by Pensky-Martens Closed Cup Tester
- D523 Test Method for Specular Gloss
- D1475 Test Method For Density of Liquid Coatings, Inks, and Related Products
- D1640 Test Methods for Drying, Curing, or Film Formation of Organic Coatings
- D1650 Test Methods for Sampling and Testing Shellac Varnish (Withdrawn 1997)⁴
- D2697 Test Method for Volume Nonvolatile Matter in Clear or Pigmented Coatings
- D3278 Test Methods for Flash Point of Liquids by Small Scale Closed-Cup Apparatus

2.2 ASTM Adjunct:

Shipbuilder's and Marine Paints and Coatings Product/Procedure Data Sheets²

2.3 U.S. EPA Method:⁵

24 U.S. Environmental Protection Agency, 40 CFR Ch. 1, Part 60, Appendix A, Determination of Volatile Matter Content, Density, Volume Solids, and Weight Solids of Surface Coatings

3. Instructions for Completing Data Sheet

3.1 When filling out the Product/Procedure Data Sheet (see Figs. 1 and 2) remember that the information contained therein will be utilized by both technical and production personnel.
