

Standard Specification for Welded Joints for Shipboard Piping Systems¹

This standard is issued under the fixed designation F 722; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the Department of Defense.

1. Scope

1.1 This specification covers typical details of welded joints commonly used in shipboard piping systems. These joints and other joints may be used provided the welding procedures used have been qualified in accordance with the applicable regulatory rules and regulations.

1.2 The values stated in inch-pound units are to be regarded as the standard.

2. Referenced Documents

2.1 Federal Standards:

Code of Federal Regulations Title 46, Shipping, Parats 30 to 40²

Code of Federal Regulations Title 46, Shipping, Parts 41 to 69²

Code of Federal Regulations Title 46, Shipping, Parts 140 to 149²

Rules for Building and Classing Steel Vessels³

3. Application, Service, Limitations, and List of Weld Joint Details

3.1 Details of welded joints, including application, service, and limitation notes, are provided in the appropriate figures, as follows:
