

Designation: F 1680 – 9602

Standard Test Method for Determining Circuit Resistance of a Membrane Switch ¹

This standard is issued under the fixed designation F 1680; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This test method covers the determination of the circuit resistance of a membrane switch utilizing a predetermined force.

1.2 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This test method is under the jurisdiction of ASTM Committee F-T F01 on Electronics and is the direct responsibility of Subcommittee F01.18 on Membrane Switches. Current edition approved Feb. 10, 1996; Jan. 10 2002. Published Apr. March 2002. Originally published as F 1680-96. Last previous edition F 1680-96.
