

Designation: F 1973 – 99^{ε02}

An American National Standard

Standard Specification for Factory Assembled Anodeless Risers and Transition Fittings in Polyethylene (PE) and Polyamide 11 (PA11) Fuel Gas Distribution Systems¹

This standard is issued under the fixed designation F 1973; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

¹ NOTE Sections 7.4.3 and 7.4.4 were editorially updated in November 2001.
^{ε2} NOTE Section 9 was editorially updated in December 2002.

1. Scope

1.1 This specification covers requirements and test methods for the qualification of factory assembled anodeless risers and transition fittings, for use in polyethylene (PE), in sizes through NPS 8, for use and Polyamide 11 (PA11), in polyethylene (PE) sizes through NPS 6, gas distribution systems.

1.2 The test methods described are not intended to be routine quality control tests.

1.3 The values given in parentheses are for informational purposes only.

1.4 Throughout this specification footnotes are provided for informational purposes and shall not be considered as requirements of this specification.

2. Referenced Documents

2.1 *ASTM Standards:*

¹ This specification is under the jurisdiction of ASTM Committee F-17 on Plastic Piping Systems and is the direct responsibility of Subcommittee F17.60 on Gas. Current edition approved ~~May~~ Sept. 10, 1999; 2002. Published ~~A~~ February 2003. Originally published as F1973-99. Last previous edition F1973-99^{ε1}.
